3 - What features of this course and of the instructor's teaching contributed most to your learning?

Amanda Bienz

Response Rate	5/21 (23.81%)
<ul style="list-style-type: none"><li>• The quizzes are the course learning helped in the understanding of the material.</li><li>• Very well organized and professional.</li><li>• I think the choice we have of either going at own pace or going along with the instructor's pace is what helps a lot, since after I learn what I can, I can make sure it stays with me from the instructor's explanations.</li><li>• I really liked the daily videos that she posted in the first half of the semester. I found them to be helpful to introduce a topic that we're going to be working on, and then when we're in class, she can go more in-depth with the topic and questions about the videos.</li><li>• Professor Bienz is very good at explaining things and helping clarify when questions arise</li></ul>	

4 - What specific suggestions do you have to improve the course and the instructor's teaching?

Amanda Bienz

Response Rate	5/21 (23.81%)
<ul style="list-style-type: none"><li>• I believe the course was effective in teaching beginning coding, I cannot think of any suggestions to improve.</li><li>• Consider running the in person lab.</li><li>• While the information shared was helpful, I'd like a little less talking as we are doing our work, since it is a bit distracting.</li><li>• The videos stopped being uploaded sometime during the second half of the semester, right when the topics started becoming more harder, so I did miss those videos as they helped, even if they're just something to look back to when confused. In the classroom, it was only Professor Bienz and Ms. Soheila who was helping the entire classroom. They were very helpful but with an entire classroom who was confused with the labs, they can only help so much people at a time, even less if there are people with in-depth questions and codes not working.</li><li>• None</li></ul>
